

IGG's iWork 2.1 Adds Overview of "All"

IGG Software, LLC is proud to announce the immediate availability of iWork 2.1 (www.iggsoftware.com/iwork). iWork is an intuitive time-billing and project management application that integrates with iCal and Address Book. Its "Mac-like" design of a main list on the left and project and work views on the right make it easy to use and understand. Some new features in iWork 2.1 include an "All" client to quickly see all of your clients' projects, built-in menu bar searching, customizable textual reports, improved invoicing, support for retainers, and much more. There are many more new features not listed here, so please, go and try it out for free and enjoy!

For those looking for a way to collaborate on projects or who need to work from multiple networked computers there is a new updated iWork Server/Client package. Using Rendezvous technology, the iWork Server/Client package allows users on different computers to have shared access to clients and projects for seamless integration.

IGG Software is also releasing iWork Server 1.1 and iWork Client today. Together they provide a networking solution for those who need to collaborate on projects in a multi-user environment.

iWork has appeared in excellent reviews in Apple's eNews (<http://www.apple.com/enews/2004/01/22enews1.html>), Apple's New Arrivals Product Guide (<http://guide.apple.com/newarrivals/2004/0202/index.html>), MacWorld and MacUser. iWork has thousands of registered users and our online forum is quickly growing (www.iggsoftware.com/phpBB/)

iWork 2.1 is a free update for previous owners of iWork 2.0, other pricing is \$29.99 or \$15.99 for upgrading users of iWork 1.x. iWork Server with two iWork Clients costs \$74.99. Users who have purchased iWork 1.4.x after January 1, 2004 can receive a free license for iWork 2

iWork can be directly downloaded by going to this URL <http://www.iggsoftware.com/iwork/iWork.dmg.bin>

The iWork Server/Client package can be downloaded here http://www.iggsoftware.com/iwork/iWork_Server.dmg.bin

IGG Software, LLC was started by Dr. Ian Gillespie in 2002 to develop enterprise strength applications for everyday Mac users.
